

TESTIMONIAL

zBoost Keeps Teleworker Happy and Dry

Challenge

I work in corporate communications, and I need to be available at a moment's notice in situations, where there is news at work that has to be communicated to employees. I work from home on a regular basis, and it's important to be available to my colleagues pretty much all the time. It was unbelievably frustrating when one of them would try to call me on my cell phone...half the time my phone wouldn't ring at all, and then two hours later I would see that there was a new voice mail. The signal at my house was just terrible, and when I worked from home, I was on pins and needles that I might be missing an important call. I live in Denver, and often this Winter and Spring (before I installed my zBoost) I had to go outside to get a signal – in snow, rain, and even hail. It was completely pathetic. I would come in from a call looking like a drowned rat.

Solution

It was stunning how easy it was to set up my zBoost. I went from having zero bars in most of the house to having five bars pretty much everywhere in a matter of thirty seconds. My zBoost has been absolutely trouble-free – installing it was unbelievably easy, and it's worked like a charm ever since. The zBoost is so completely, consistently perfect. No more going outside in all kinds of weather to get a signal; no more missed calls from work; no more worrying about missing calls from work – the zBoost is fantastic for keeping me connected to work and for my peace of mind. I love my zBoost probably more than a person should love what is, technically, an inanimate object. It's just amazing.

Client Overview

Lauren M.

Senior Communicator

Corporate Communications

Denver, Colorado

Benefits

- Boosts indoor signal for cell phones, smartphones, wireless data cards and wireless alarm panels.
- Reduces dropped calls and improves cell phone signal indoors, increasing performance of voice and data. Some of the benefits for the cell phone users include extending battery life, replacing landline phones, reducing or eliminating dropped calls and increasing wireless performance.
- Improves indoor cell phone voice and data signals for all major carriers (except Nextel).
- Utilizes distributed amplifier architecture for increased reliability and flexibility.
- All system components included for easy installation.
- System kits available for coverage areas up to 20,000 and 40,000 square feet.
- Uses patent-pending technologies that protect the carrier network

zBoost Products Used

zBoost YX545 SOHO

Designed for consumers, zBoost SOHO cell phone signal boosters extend a Cell Zone™ for multiple users and ALL devices operating on 800 and 1900 MHz frequency bands except those using Nextel/iDEN, 4G or 2100Mhz. zBoost SOHO boosts signal up to 3000 square feet, making it perfect for your home or office.
