

TESTIMONIAL

zBoost Helps Jason Lewis Glass Receive Clear Calls and No Static

Challenge

I am a glassblower in Wells, Vermont where cell service is pretty spotty. Clear reception is essential for running my business and nobody likes getting one of “those static cell phone calls”.

I have tried many cell reception boosters in the past that had great claims about how great your cell service was going to be after buying their product. All previous purchases didn't really work, at least not enough to notice.

The \$299 I spent on the Wi-Ex zBoost was a substantial investment that I was hesitant about making because of my experiences with the other companies, but I really needed to use my cell to make clear phone calls.

Solution

Even though the cell phone provider guaranteed me service at my house, I got no bars until I got my zBoost. After adding the zBoost, I went from 0-1 bars to getting full service. Anywhere I previously got 1 bar, I now get full bars. And many, many places where I didn't have any service I can now make clear calls.

Cell service is priceless and buying the zBoost was worth every penny and so much more. If you live in rural America, this is the product for you. It's quite rare that I'm this ecstatic about a product.

The zBoost is really, probably one of the best products, I ever purchased. -Jason

Company Overview

Jason Lewis Glass

- Original Hand crafted glassware
- Orbs
- Jewelry
- Paperweights
- Vessels
- Glowing

www.JasonLewisGlass.com

Benefits

- Boosts indoor signal for cell phones, smartphones, wireless data cards and wireless alarm panels.
- Reduces dropped calls and improves cell phone signal indoors, increasing performance of voice and data. Some of the benefits for the cell phone users include extending battery life, replacing landline phones, reducing or eliminating dropped calls and increasing wireless performance.
- Improves indoor cell phone voice and data signals for all major carriers (except Nextel).
- Utilizes distributed amplifier architecture for increased reliability and flexibility.
- All system components included for easy installation.
- System kits available for coverage areas up to 20,000 and 40,000 square feet.
- Uses patent-pending technologies that protect the carrier network.

zBoost Product Used

zBoost YX545 SOHO

Designed for consumers, zBoost SOHO cell phone signal boosters extend a Cell Zone™ for multiple users and ALL devices operating on 800 and 1900 MHz frequency bands except those using Nextel/iDEN, 4G or 2100Mhz. zBoost SOHO boosts signal up to 3000 square feet, making it perfect for your home or office.
