## zBoost Helps Total Building Environments South Put an End to Dropped Calls and Slow Data

### Challenge

We have a small company and I work out of my home. Just moved to a new (new to me) home and found that the Sprint (Virgin) coverage was just terrible in this part of Pinellas County Florida. Barely got one bar and dropped almost every call. Looked on the Sprint coverage map and sure enough they do a really bad job in this area!

### Solution

Searched on the web and at EBay for a booster device, found lots of stuff, mostly BS!

Finally found zBoost! Bought a supposedly used zBoost SOHO (YX545) from Amazon for \$128! When received I was very surprised to find it looking brand new, in what appeared to be the original wrappers!

Took me about 20 minutes to install with the antenna on top a 20' pole on the side of my single story house.

WOW, a 4 to 5 bar signal. It does vary down to 2 bars or so, but the reception is noticeably better and no dropped calls.

Thanks zBoost! This is a REAL product that REALLY works!

Thanks for a great product!

Bruce Cramer VP  
Total Building Environments South, Inc

### Company Overview

#### Total Building Environments South, Inc.

A Total Solution Provider

Building Automation Systems, Systems Integration, Power Monitoring Systems, Intrusion Systems, CCTV Systems, Access Control Systems

Serving the USA and the World

## Benefits

- Boosts indoor signal for cell phones, smartphones, wireless data cards and wireless alarm panels.
- Reduces dropped calls and improves cell phone signal indoors, increasing performance of voice and data. Some of the benefits for the cell phone users include extending battery life, replacing landline phones, reducing or eliminating dropped calls and increasing wireless performance.
- Improves indoor cell phone voice and data signals for all major carriers (except Nextel).
- Utilizes distributed amplifier architecture for increased reliability and flexibility.
- All system components included for easy installation.
- System kits available for coverage areas up to 20,000 and 40,000 square feet.
- Uses patent-pending technologies that protect the carrier network.

## zBoost Product Used

### zBoost YX545 SOHO

Designed for consumers, zBoost SOHO cell phone signal boosters extend a Cell Zone™ for multiple users and ALL devices operating on 800 and 1900 MHz frequency bands except those using Nextel/iDEN, 4G or 2100Mhz. zBoost SOHO boosts signal up to 3000 square feet, making it perfect for your home or office.
