

## Android Accessory Roundup: zBoost 4G LTE Signal Booster, samDock Cable, Y-Cam HomeMonitor System and More

by: [Tim-o-tato](#) | posted 05.24.13 | [Accessories](#), [News](#), [Reviews](#)

The accessories industry is very large and continues to grow daily. Couple that with the fact that smartphones are starting to take over the world's population, leaving you with entire conferences such as CTIA and CES, based solely on consumer items, such as smartphone accessories.

We wanted to try and highlight some of the accessories we have stumbled across in a roundup post, so allow us to introduce the **Android Accessory Roundup**. We will go over the basic function of the accessory, the pros and cons, the price of said accessory and that's it. Hopefully this will help some folks find a neat new toy that goes will with their favorite gadget.

### **zBoost Verizon 4G LTE Signal Booster: (\$399.99)**

The idea of a signal booster, allowing someone who lives in an area with 4G LTE, but with weak signal is intriguing. This model is specifically made for Verizon's 4G LTE and allows multiple users to connect to it, improving signal strength and it even advertises improved download/upload speeds. If you have the initial investment of \$400, this accessory has the ability to turn your cellular blackhole of a home into a data oasis.

As for setbacks, the price is certainly one of them, along with the fact that you must install the antenna of the unit onto your roof or somewhere that it can catch a signal. If drilling holes into your apartment or home isn't possible, you will need to find alternate methods to your data problems.
