## **TGP – #118 zBoost SOHO YX545 – It Works Really Well!**

POSTED BY GADGET AT 9:17 PM

Welcome to The Gadget Professor Show #118 hosted by Don Baine.

We've Got Technology Covered! The Gadget Professor Show – a proud member of the Tech Podcast Network!

zBoost SOHO cell signal booster extends a Cell Zone™ for multiple users and all devices operating on 800 and 1900 MHz frequency bands. zBoost SOHO boosts signal up to 3000 square feet, making it perfect for your home or office.

Benefits Include:

Increases indoor signal coverage-up to 3000 sq ft

Supports multiple users simultaneously

Compatible with all U.S. carriers and mobile devices using 800 & 1900 MHz (except Nextel/iDEN or 4G, 2100MHz phones)

Increases voice and data transmission

Decreases dropped or missed calls

Easy to set up – comes complete with everything you need

No cradle or connections to your phone

Extends phone battery life (uses less power when signal is stronger)

Protects the carrier network using patented technology
