

## **zBoost Now Shipping zBoost SOHO and zBoost Mobile1 - FCC Approved Cell Phone Signal Boosters Minimize Dead Zones, Reduce Dropped Calls and Speed 3G Data**

*zBoost is now shipping its zBoost cell phone signal booster kits including the zBoost SOHO line and the zBoost Mobile1. All products received the new FCC certification.*

Atlanta, GA ([PRWEB](#)) May 23, 2014 -- [zBoost](#), a leading provider of consumer cell phone signal booster kits, is now shipping its zBoost cell phone signal booster kits including the zBoost SOHO line and the zBoost Mobile1. All products received the new FCC certification. The new FCC certification applies to 80% of the zBoost consumer products including the popular zBoost SOHO line and zBoost Mobile1. The new zBoost products feature parts numbers with ZB instead of the previous YX, i.e. their leading selling product, the YX545 has improved gain and new FCC certification and is now the ZB545.

“Consumers rely on their smartphones, cell phones and tablets to stay connected, entertained and organized. However, a poor indoor or in-vehicle signal can make that a challenge,” said Sharon Cuppett, zBoost vice president of marketing, “The zBoost cell phone signal boosters provide an easy-to-install solution for the millions of consumers with poor indoor and in vehicle cell phone signal. With our zBoost products, we see firsthand the positive impact of cell phone signal boosters with our customers and look forward to continuing to roll out our new products to consumers in the near future.”

### [zBoost SOHO](#) - Kit Complete for Easy Set Up

The zBoost SOHO line provides consumers with an enhanced cell phone signal on all connected devices operating on the 800 and 1900 MHz frequency for up to 5,500 square feet. Units come kit complete with an easy setup solution - software intelligence auto-adjusts the booster, so no knobs are needed for manual adjustments. zBoost products use patented technology and protect the carrier network. The new zBoost SOHO line includes:

#### zBoost SOHO

- Requires 2 to 3 bars outside and coverage up to 2,500 square feet

#### zBoost SOHO Max

- Requires 1 to 2 bars outside and coverage up to 3,500 square feet

#### zBoost SOHO Xtreme

- Requires 1 to 2 bars outside and coverage up to 5,500 square feet

### [zBoost Mobile1](#) - More Miles of Signal

The zBoost Mobile1 comes kit complete with a power supply, antenna and cabling, and a bi-directional amplifier unit housed in a sturdy, lightweight cradle. The zBoost Mobile1 will retail for \$89 MSRP. Benefits of the zBoost Mobile1 include:

- “Hands-free” operation to boost signal for voice and text for all phones
- Boosts in-vehicle signal for a single user
- Reduces dropped calls and dead zones
- Extends cell phone battery life

\*Coverage results vary. Coverage is dependent on strength of outside signal and building construction.

#### [About zBoost](#)

zBoost ([www.zBoost.com](http://www.zBoost.com)), a leading provider of consumer cell phone signal booster kits and manufacturer of the popular zBoost cell phone signal booster, was the first company to introduce consumer-priced, easy-to-install - no knobs, cell phone signal booster kits that “extended cell zones” for the home market. Starting April 30, 2014, the FCC will require all consumer cell phone signal boosters to be kitted. The zBoost product line works with most carriers in the North America including AT&T®, Sprint®, T-Mobile® and Verizon®. The award-winning zBoost home solutions help today's connected consumers using iPhone, iPad, Android (DROID), BlackBerry with dropped calls and slow data. zBoost’s recognition by industry leaders includes: 2007 and 2010 Consumer Electronics Association Innovations Honoree by the Consumer Electronics Association (CEA), a 2011 and 2012 EXC!TE honoree, 2012 CE PRO’s Top 100 Technology Providers and a finalist for the 2007, 2009 and 2013 CTIA Emerging Technologies (E-Tech) Award. zBoost continues to develop innovative products that meet the demands of an increasingly wireless society by enhancing wireless signals.
